

Immunic Therapeutics is a dynamic biotechnology company with a pipeline of selective oral immunology therapies. We are developing new therapies with best-in-class potential for the treatment of chronic inflammatory and autoimmune diseases. Currently, we have three small molecule products in different stages of clinical development. For further information, please visit: [www.imux.com](http://www.imux.com).

We are a passionate and ambitious team that loves to work together. Immunic is an exciting place for fresh ideas – apply now and become part of our international team!

We are looking for a

## **(Senior) Clinical Project Manager (m/f/x) (PT or FT)**

**for an unlimited part-time (at least 80% required) or full-time position in order to reinforce our Gräfelfing/Munich based team.**

Immunic is looking for a project leader for the operational execution of a phase 3 development. Ideally, we are looking for a candidate who can oversee, direct and lead all project-related clinical operations activities for this project. The Clinical Project Leader works directly with the Head of Clinical Operations and the Chief Medical Officer of Immunic.

### **We anticipate a broad scope of activities:**

- Leading the preparation of a Phase 3 trial in Multiple Sclerosis in collaboration with a CRO (protocol development, performing site/country qualifications, and regulatory submissions), medical consultants and experts, and with regulatory consultants
- Act as overall clinical project manager for this study in all aspects, including
  - Providing sponsor oversight of all activities
  - Vendor qualifications
  - Selection of and interaction with service providers, including being the primary contact of the company for these service providers, and perform vendor qualification
  - Oversee start-up activities of trial
  - Review study data entry on ongoing basis and make recommendations for further activities to achieve goals
  - Oversee the project budget
  - Participate in the ongoing preparation of End-of-Phase 2 meetings
  - Participate in CRO selection and bid-defense activities
  - Interacting with medical experts and the Steering Committee
- Should require at least 80% of FTE of full-time
- Last, but not least you will work closely with the Immunic management team to provide reporting of execution of Phase 3 goals and timelines.

**Here is how to convince us:**

- Our team is small, and you enjoy working in a dynamic work environment of an entrepreneurial company.
- You are open-minded, and you strive to find the best solutions in a team environment.
- You are able to self-structure your work and drive processes, have good project management skills, and are willing to take responsibility and make decisions.
- You are used to work on your own initiative but with high team spirit and the ability to network within the team.
- You are happy to work in a flat hierarchy environment and have a hands-on mentality.
- You have a good cultural fit to the current team of Immunic.
- You are fluent in English with the ability to communicate accurately and effectively in verbal and written form (German language skills are optional).
- You have experience in the clinical development of pharmaceuticals, including experience in a pharma or biotech company or CRO.
- You have been involved in phase 2 or phase 3 clinical trials in different medical indications.
- You have been involved in regulatory submissions or start-up activities.

**What you can expect:**

- A flexible working environment
- A small, highly motivated team as well as dynamic and multicultural work environment
- An innovative company that is constantly growing and moving
- An attractive office with good public transport connections to the city center of Munich

Please send your meaningful application specifying your salary expectations as well as the earliest possible starting date by email to Erika von der Decken: [jobs@imux.com](mailto:jobs@imux.com).
